Total Control of the Oral Environment.

Increase Productivity

Improves clinical outcomes with consistent results. Frees assistants from suctioning and retracting to focus on preparing. Improves characteristics of dental materials for fewer re-dos.

Decrease Chair Time

Cuts down preparation, procedure, and clean-up time, readying operatories sooner. Enables you to see more patients a day or take more time off.

Augment Safety

Protects against aspiration and ingestion of instruments, materials, and debris without obstructing airway. Prevents inadvertent nicks of tongue, cheeks, floor of mouth, and lips.

Decrease Moisture & Humidity

Continuously evacuates saliva and excess moisture. Reduces oral humidity just as well as a rubber dam, without the difficult and time-consuming setup. Reduces airborne aerosols and spatter.

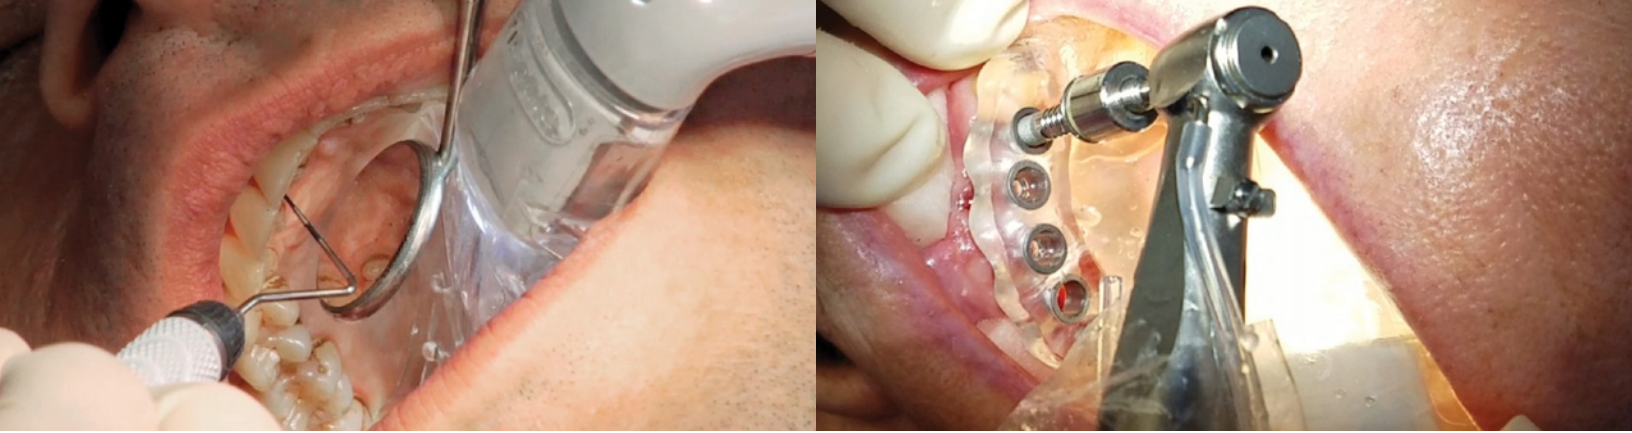

Improve Visibility

Five levels of brightness maintain clear intra-oral illumination for the entire dental team. Provides clear view of airway throughout the procedure. Reduces fogging of mirrors, glasses, and loupes.

“IF YOU WANT YOUR PATIENTS TO HAVE AN **EASY EXPERIENCE** AND LEAVE SAYING, “**YOU KNOW WHAT, THAT WAS EASY!**” YOU HAVE TO BE ABLE TO ISOLATE AND CONTROL THE ENVIRONMENT. **ISOLITE CONTROLS THE ENVIRONMENT.**”

Dr. David Fantarella, DMD, PC
General, Implant & Laser Dentistry
North Haven, CT

Time-Saving, Efficient.

Isolite® Systems aids in dental procedures by improving patient management and giving you unprecedented control of the oral environment. Keep your patient's mouth open, improve visibility, control suction and oral humidity, and minimize sources of contamination.

Work effortlessly in two quadrants at one time.

Simultaneously isolate maxillary and mandibular quadrants. Fine-tune suction per quadrant for increased control of the treatment area.

Easy Integration.

Our systems easily integrate into every operator, including hygiene. It's like having an assistant for your dental hygienist.

“ I’M ABLE TO DO DUAL QUADRANTS,
SO I’M MUCH MORE EFFICIENT
THAN WITH THE RUBBER DAM.”

Dr. Michele Savel, DDS
Pediatric & Laser Dentistry
New York, NY

NON-ILLUMINATED

ILLUMINATED

Safe, Predictable, Consistent.

Effective dental isolation is vital to the success of almost every dental procedure because it minimizes contamination, thereby contributing to clinical success. Using Isolite Systems, you can achieve **total control of the oral environment**, making everyday procedures easier, safer, and more predictable.

General Dentistry

Hygiene

- Sealants
- Ultrasonic Scaling
- Root Planing
- Air Polishing

“ I USE ISOLITE FOR SEALANTS, FOR RESTORING TEETH, FOR DOING PULPOTOMIES AND STAINLESS STEEL CROWNS, INTERPROXIMAL RESIN RESTORATIONS, AND IF I NEED TO USE THE ULTRASONIC SCALER FOR A HYGIENE PATIENT.”

Isolite keeps the working field as dry as a rubber dam, but is as easy to use as cotton rolls.

MANUAL ISOLATION	ISOLITE®	RUBBER DAM
isolates small areas	isolates two full quadrants	isolates up to one quadrant
manual suction	hands-free continuous suction	manual suction
98% AVG. ORAL HUMIDITY*	43% AVG. ORAL HUMIDITY*	43% AVG. ORAL HUMIDITY*

*A Study of Humidity and Its Effect on Bond Strength by Michael J. Melkers, DDS, FAGD.

Dr. Beth Kailes, DMD
Pediatric Dentistry
Fleming Island, FL

Every Mouth, Pediatric to Adult.

Isolite Systems provides six sizes of Mouthpieces designed to fit the widest range of patients, giving you easy and effective isolation for every patient, every time.

Each Mouthpiece is color-coded for intuitive, more efficient stocking and pulling and individually packaged to ensure they are guaranteed clean.

Increase Comfort

Gently holds mouth open with jaw in a resting position throughout the procedure. Softer than gingival tissue.

Enhance Retraction

Safely tucks tongue and cheek out of the way. Restricts probing tongue from compromising your work.

Improve Accessibility

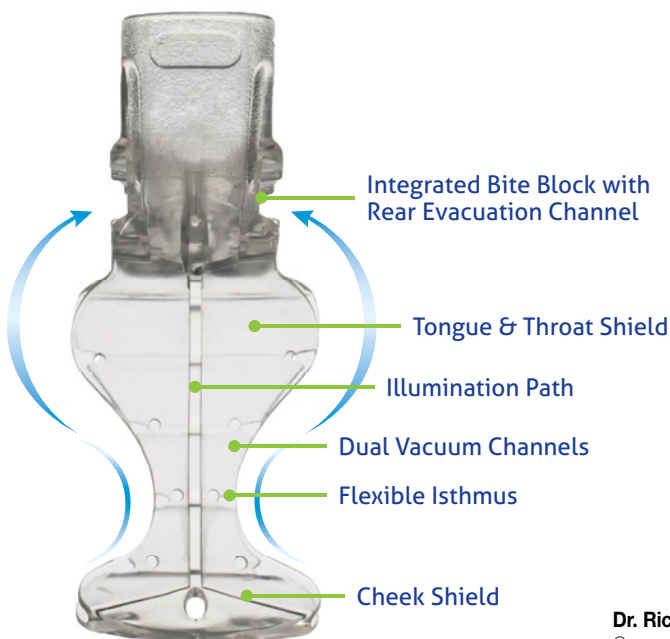

Provides plenty of room for instrumentation and easy manipulation and insertion of materials.

Single-Use Means Safe.

Our economical, single-use Mouthpieces eliminate the risk of patient cross-contamination and provide effective compliance with infection control protocol.

“IT MAKES THE PATIENT MORE COMFORTABLE. AND IT MAKES ME MORE PROFITABLE.”

Dr. Richard Creaghe, DDS
General & Cosmetic Dentistry
San Rafael, CA

Proven, Reliable, Award-Winning.

Over 25,000 dentists, RDA's, EFDA's and hygienists in over 30 countries worldwide rely upon Isolite®, Isodry®, and Isovac® every day to enhance the dental care they provide. Isolite is a standard protocol used in the United States military and public health facilities and is taught in over 90 dental schools and educational programs.

The proprietary design of our Mouthpieces is the heart of our award-winning systems.

Three Systems to Meet your Needs

Isolite Systems offers both illuminated and non-illuminated systems that integrate directly into your dental chair and a portable adapter that temporarily replaces your existing HVE valve or saliva ejector whenever you need it.

See for Yourself!

Take advantage of our 30-day no-risk guarantee and see for yourself the difference Isolite will make to improve your practice.
