

Fit Strip™

Flexible
Interproximal finishers with a
Twist

FitStrips are a complete line of interproximal trimmers and finishers from the company that invented tight interproximal contacts, **Garrison Dental Solutions.**

One handy handle! FitStrips' simple, detachable handle makes a world of difference for both clinician ease of use and patient comfort. Your hand stays outside the mouth, granting a clear field of view and easier operation.

Do the Twist! Twist the color-coded barrel to adjust FitStrips' curvature and it's automatically locked in place. It doesn't get any easier than that!

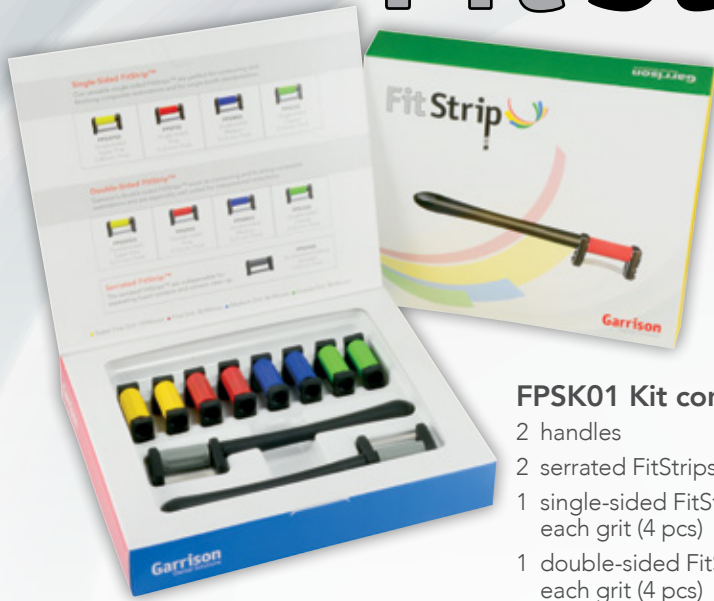

FitStrips make your procedures easier!

- Composite restorations: contouring/finishing all interproximal surfaces
- Orthodontics: IPR/tooth slenderizing
- Crown and bridge: cement removal and clean-up

Ready for a marathon! FitStrips are very durable and long lasting. They stay sharp and ready to go even after multiple autoclave cycles.
