matrix
systems

polydentia

swiss manufacture 

Thin central region for any restoration of the cervical area

Contoured surfaces for a perfect reconstruction of proximal walls

Posterior wings for an easy placement of the matrix

"In today's conservative dentistry, the choice of products and the techniques we apply everyday must be predictable and cost-effective, incorporating clear-cut advantages to our daily procedures. Unica is the solution to everyday anterior restorations, whether it be class III, IV, V, shape modifications, and/or composite veneers in direct stratification technique. One effective matrix for everyday anterior aesthetic and functional results."

Dr. Jordi Manauta, DDS
Head of StyleItaliano Idea Factory
Sestri Levante, Italy
